

JANIDU WELARATHNA

| Colombo 02, Sri Lanka | 070 550 3304 | janiduhwelarathna@gmail.com | [LinkedIn](#) | [GitHub](#) | [Medium](#) |

SUMMARY:

Software Engineering graduate (BSc Hons, Second Class Upper) from the University of Bedfordshire with 1+ year of industry experience in full stack development. Skilled in React, .NET, cloud platforms (AWS, Azure), and AI integration. Published researcher in Explainable AI and NLP-based mental health detection. Hackathon finalist with a strong foundation in building scalable, production-grade applications. Seeking roles in Full Stack Engineering or AI/ML Engineering where technical depth and research experience can drive real-world impact.

EXPERIENCE:

Associate Software Engineer - Sri Lanka **VFullstack (PVT) LTD | May 2025 – Dec 2025**

- Developed and delivered full stack features using React and .NET across the full SDLC.
- Designed and consumed RESTful APIs integrated with SQL databases.
- Implemented performance optimisations, bug fixes, and feature enhancements for production systems.
- Worked with CI/CD pipelines and cloud environments on AWS and Azure.
- Collaborated with product, design, and QA teams to ensure stable and timely releases.
- Prepared technical documentation including requirement specifications and design documents.

Junior Full Stack Engineer - Sri Lanka **SoftedgeLab (PVT) LTD | Sep 2024 – Feb 2025**

- Contributed to enterprise web application development using React and .NET.
- Built and maintained secure REST APIs and integrated frontend components.
- Participated in Agile sprints, code reviews, and sprint planning using ClickUp.
- Maintained backend technical documentation using Confluence.
- Supported CI/CD workflows and deployment processes in cloud environments.

EDUCATION:

- **BSc (Hons) Software Engineering - Second Class, Upper Division**
University of Bedfordshire (UK) via SLIIT City Uni | Jul 2022 – Mar 2025
- **Higher Diploma in Information Technology**
SLIIT City Uni, Colombo, Sri Lanka | Jul 2022 – Sep 2024

RESEARCH

- **Speech and Text Based Students' Mental Health Detection System Using NLP with Explainable AI**
Published March 2026 · ICARC 2026 - 6th International Conference on Advanced Research in Computing
[Paper Link](#)
- **Explainable AI Powered Mental Health State Capturing Application to Support Students' Academic Stress Mitigation**
Published July 2025 · ARCSCU 2025 & ICAC 2025 - International Conference on Advancements in Computing
[Paper Link](#)

ACHIEVEMENT & CERTIFICATIONS

Hackathon Recognition

- IDEALIZE'25 - Hackathon Finalist, AIESEC in University of Moratuwa (2025)
- Codefest - Hackathon Finalist, SLIIT (2025)
- MindStudio - Hackathon Runner-up, Pearson (2024)
- Designthon - Hackathon Participant, SLIIT (2025)

AI & Cloud Certifications

- Azure AI Fundamentals - Microsoft Azure (2025)
- AWS Cloud Introduction - Amazon Web Services (2025)
- AI for Entrepreneurship Development - International BDCE Institute (2025)
- GitHub Foundations - GitHub (2025)
- Presented at ICARC 2026 & ICAC 2025 - International Computing Conference

KEY PROJECTS

- **Autism Detection & Cybercrime Analysis Using Large Language Models**
Active research project using Ollama LLMs, LLaMA 3.1 8B and QWEN 3 14B for behavioural pattern detection.
- **Sri Lanka Stock Market Prediction** - *Python, Flask, Next.js, Random Forest, XGBoost*
ML-powered stock prediction platform using ensemble models to forecast Sri Lankan market trends with real-time data visualisation.
- **iOS Personalised AI Assistant** - *Swift, SwiftUI, Ollama, Gemma3*
On-device AI assistant running a local LLM via Ollama — fully offline, no cloud dependency, with natural conversation interface.
- **Law Case Management System** - *Next.js, Node.js, MongoDB, AWS, Azure AI*
Full stack legal platform with an Azure AI-powered chatbot for case queries, document management, and client tracking.
- **Clone Writer** - *Next.js, Ollama*
AI writing assistant that learns and replicates a user's personal writing style using locally hosted LLMs via Ollama.
- **Travel Web Application** - *Next.js, Supabase, Tailwind CSS, PayHere*
End-to-end travel booking platform with integrated Sri Lankan payment gateway (PayHere) and real-time booking management.
- **Banana Runner 3D Game** - *React.js, Three.js, Node.js, MongoDB*
Browser-based 3D runner game with real-time global leaderboard, multiplayer backend, and interactive 3D rendering.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, PHP, Swift, Dart, C#
- **Frontend:** React.js, Next.js, SwiftUI, Tailwind CSS, Three.js
- **Backend:** .NET, Node.js, Flask, Java Servlet/JSP, REST API Design
- **AI / ML:** Machine Learning, Deep Learning, NLP, LLMs, Explainable AI (XAI), Random Forest, XGBoost, Ollama (LLaMA 3.1 8B, QWEN 3 14B, Gemma3), Azure AI
- **Databases:** MongoDB, MySQL, SQL Server, Supabase, NoSQL
- **Cloud & DevOps:** AWS, Microsoft Azure, CI/CD Pipelines, GitHub Actions
- **Tools & Methods:** Git, GitHub, Jira, ClickUp, Confluence, Agile/Scrum
